# SPECIFICATION Micronel Radial Blower U100UL-024KA-4

# GENERAL INFORMATION

ltem

| Product type | Radial blower with integrated electronic motor driver |
|--------------|---|
| Article no.  | U100UL-024KA-4  |
| Manufacturer | Micronel AG   |
| Customer     | N/A   |
| Project no.  | N/A   |
| Modification | Standard product                                      |

# APPLICATIONS

The versatile, high-power Micronel blower type U100UL-024KA-4 can be used for industrial applications, where highest vacuum or pressure performance is needed, i.e. for pick and place applications, particles and liquids suction and many more.

- Pressure: 114 hPa, flow rate: 865 l/min
- 24 V<sub>DC</sub> brushless DC-motor
- Solid aluminum housing
- For harsh industrial environments
- Ingress protection (EN60529) IP67
- Speed control and tacho frequency output
- G3/4 inch thread at inlet and outlet

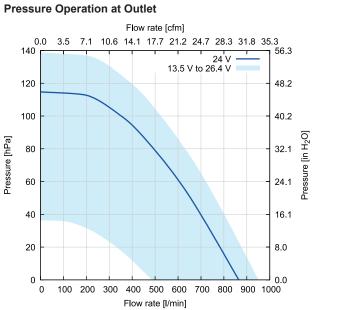

### **GENERAL CONDITIONS**

Unless otherwise stated all data are measured at nominal voltage and are valid at 20 °C ambient temperature and 1.2 kg/m<sup>3</sup> standard air density. Values listed are nominal and can vary depending on the installation conditions and due to component tolerances. Test setup according to ISO 5801 with standardized inlet and outlet chambers. Tolerances based on specified speed data according to ISO 13348, grade 4: pressure +/-10 %, power +16 %. Tolerances based on constant voltage: speed +/-10 %, pressure +/-21 %, power +33 %. For continuous blower operation please refer to specified maximum ratings. Performance data outside normal operating range plotted for information only.

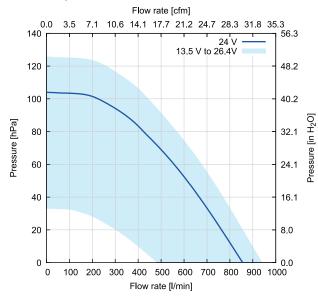

### PERFORMANCE

|   |                    |   |

<sup>(1)</sup> Recommended minimum continuous power supply current for proper start-up behavior at nominal voltage. This is an indicative value. Power supply dimensioning, wiring, safety, setup and validation is the customer's responsibility.

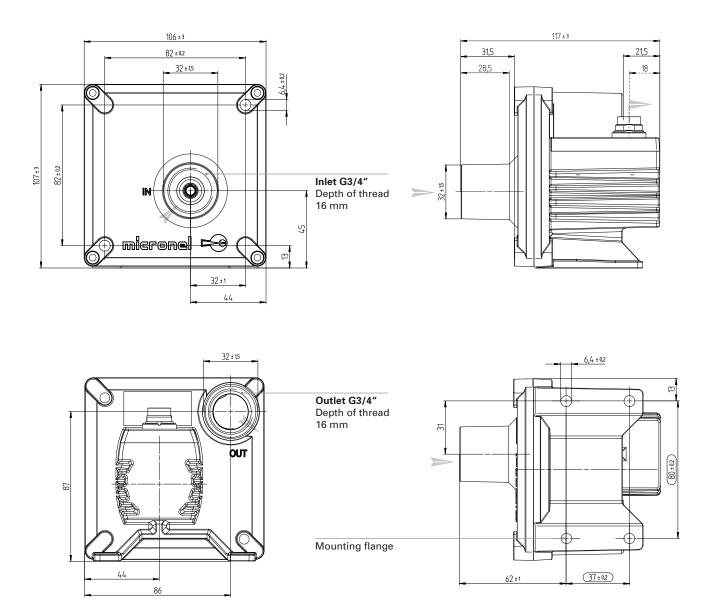

<sup>(2)</sup> Micronel blowers are designed for various levels of oxygen compatibility. Further information available on request.

(3) Accelerated aging test at 45 °C ambient temperature, continuous operation, flow control with 4.5 mm diameter orifice plate at outlet, normal cleanliness according to ISO 281. Temperature dependency of lifetime according to IPC-9591: factor 1.5 per 10 °C.

#### **ELECTRONIC FUNCTIONS**

### Integrated Electronic Motor Driver

# Туре

Features

Micronel brushless direct current motor driver

- Integrated speed control (analog / resistive)
- Tachometer frequency signal
- Locked rotor protection
- Over current protection

#### **Speed Control Input**

The blower speed can be controlled by either input voltage or input resistor value. See "Set Speed Input" table for further details.

# **Tachometer Output**

- Tachometer frequency:
- 3 pulses per revolution
- n = 20 f
- n Rotation speed [rpm]
- f Tacho frequency [Hz]

| Set Speed Input Voltage [V <sub>DC</sub> ] | Operation Mode                             |
